

PAYAL MALKOTIA

B.Tech Computer Engineering Student | Full-Stack Web Developer (MERN)

Amritsar, Punjab | +91-9015339895 | malkotiapayal@gmail.com
github.com/12345656789S | linkedin.com/in/payal-malkotia-64227a343

PROFESSIONAL SUMMARY

Motivated B.Tech Computer Engineering student specializing in Full-Stack Web Development (MERN stack) with hands-on experience building responsive, database-driven, secure web applications using React.js, Node.js, Express, and MongoDB, along with Java, Python, and SQL. Skilled in translating requirements into clean, maintainable code across front end, back end, and database layers, with a strong foundation in OOP, RESTful API design, authentication, and Git-based version control. Applied AI/prompt engineering to build an AI-powered interview preparation tool. Seeking to contribute to a fast-paced software development team.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, Bootstrap, REST APIs

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Postman, Google Colab, JWT Authentication

Core Concepts: Object-Oriented Programming, Data Structures, Full-Stack Development, RESTful API Design, AI Prompt Engineering, Responsive Web Design

PROJECTS

AI Interview Preparator | React.js, Node.js, Express, MongoDB, OpenAI API 2024

- Built a full-stack web application that generates role-specific mock interview questions and delivers instant AI-generated feedback on user answers using a large language model API.
- Designed a React.js front end for a real-time interactive interview flow (question display, timed answer input, and feedback panel) and a Node.js/Express backend to manage sessions and API calls.
- Engineered prompt templates for the AI model to evaluate answers on clarity, relevance, and structure, and stored session history and feedback scores in MongoDB so users could track progress over time.

TaskFlow – Full-Stack Task Management App | React.js, Node.js, Express, MongoDB, JWT 2024

- Built a full-stack MERN application enabling users to create, assign, and track tasks in real time, with a React.js front end and a Node.js/Express REST API backend.
- Designed a MongoDB schema for users, tasks, and projects, and implemented JWT-based authentication so each user could securely access only their own data.
- Implemented drag-and-drop status boards (To-Do / In Progress / Done) and responsive layouts, improving usability across desktop and mobile.

Campus Library Management System | Java, OOP, MySQL, JDBC 2023

- Developed a Java desktop application to manage book inventory, member records, and issue/return transactions, replacing manual tracking.
- Applied OOP principles (inheritance, encapsulation) to design modular classes for Book, Member, and Transaction entities, connected to a MySQL database via JDBC, with automatic fine calculation and due-date reminders.

Bank Management System | Python, OOP 2023

- Built a console-based banking application in Python supporting account creation, deposits, withdrawals, balance inquiries, and customer record management, using object-oriented and modular design to keep the codebase easy to extend.

EDUCATION

B.Tech, Computer Engineering — Amritsar Group of Colleges (SGPA: 7.60) 2023 – 2027

Senior Secondary (XII) — GSSS Ghanari (78%) 2022 – 2023

Matriculation (X) — Parmar International School (76%)

CERTIFICATIONS

- The Complete Full-Stack Web Development Course — Udemy
- Artificial Intelligence & Machine Learning (Module I & II) — AGC
- Hands-On Data Analytics with Apache Hadoop & Pig on Ubuntu — AGC
- Virtual Banking Project Certificate (Python) — Great Learning

Soft Skills: Leadership, Communication, Team Collaboration, Critical Thinking, Adaptability, Time Management, Creativity
