

PAYAL MALKOTIA

B.Tech Computer Engineering Student | Full-Stack Web Development

Amritsar, Punjab | +91-9015339895 | malkotiapayal@gmail.com | github.com/12345656789S | linkedin.com/in/payal-malkotia-64227a343

PROFESSIONAL SUMMARY

Motivated B.Tech Computer Engineering student specializing in Full-Stack Web Development with hands-on experience building responsive, database-driven applications using the MERN stack (React.js, Node.js, MongoDB), Java, and Python. Skilled in translating requirements into clean, maintainable code and comfortable working across the front end, back end, and database layers. Strong foundation in OOP, problem-solving, and Git-based collaboration; eager to contribute to a fast-paced development team.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Web Technologies: HTML5, CSS3, Bootstrap, React.js, Node.js, REST APIs, Responsive Web Design

Databases & Tools: MongoDB, MySQL, Git/GitHub, VS Code, Google Colab

Concepts: Object-Oriented Programming, Full-Stack Development, Data Structures, AI Prompt Engineering

PROJECTS

TaskFlow – Full-Stack Task Management App (React.js, Node.js, Express, MongoDB, JWT)

- Built a full-stack MERN application enabling users to create, assign, and track tasks in real time, with a **React.js** front end and a **Node.js/Express REST API** backend.
- Designed a **MongoDB** schema for users, tasks, and projects, and implemented **JWT-based authentication** so each user could securely access only their own data.
- Implemented drag-and-drop status boards (To-Do / In Progress / Done) and responsive layouts, improving usability across desktop and mobile.

Campus Library Management System (Java, OOP, MySQL, JDBC)

- Developed a Java desktop application to manage book inventory, member records, and issue/return transactions, replacing manual tracking.
- Applied **OOP principles** (inheritance, encapsulation) to design modular classes for Book, Member, and Transaction entities, connected to a **MySQL** database via JDBC.
- Added automatic fine calculation and due-date reminders, and validated inputs to prevent duplicate or invalid entries.

Bank Management System (Python, OOP)

- Built a console-based banking application in Python supporting account creation, deposits, withdrawals, balance inquiries, and customer record management.
- Applied object-oriented and modular programming to keep the codebase organized and easy to extend, strengthening core problem-solving skills.

EDUCATION

B.Tech, Computer Engineering – Amritsar Group of Colleges 2023 – 2027 | SGPA: 7.60

Senior Secondary (XII) – GSSS Ghanari 2022 – 2023 | 78%

Matriculation (X) – Parmar International School 76%

CERTIFICATIONS

- The Complete Full-Stack Web Development Course – Udemy
- Artificial Intelligence & Machine Learning (Module I & II) – AGC
- Hands-On Data Analytics with Apache Hadoop & Pig on Ubuntu – AGC
- Virtual Banking Project Certificate (Python) – Great Learning

SOFT SKILLS

Leadership • Communication • Team Collaboration • Critical Thinking • Adaptability • Time Management • Creativity
